Carbon Landscape Project Survey

Dear Sir/Madam,

The bearer of this letter is assisting in a project that is helping to study the current status of wildlife. Volunteer surveyors are being asked to carry out a survey according to a standard method that has been developed as part of the Carbon Landscape Project.

We hope that most of the survey can be done from public rights of way but we would also be very grateful for your permission for access onto your land if it is needed for the purposes of this study.

If you would like further information about this study or would like a summary of the results when they become available later this year, please do not hesitate to contact me. My contact details are shown above.

Thank you for your cooperation,

Derek Richardson
